Eric -

I think this looks good. I have only a couple of minor comments.

The page numbers start on page 3 with a long footer. It looks like there may be two sections in the document. I suggest a simple page number on each page.

On page 7 (the EPA response to Table 22 comment), instead of "EPA now recommends that time spent in one area be changed from 50% to 25% ...", I suggest we just say "... time spent in one area be changed to 25% ...". Otherwise I think it is confusing because they first said 10%, and then we said 50%, which we ended up not changing to. So I would rather just state the one value that we want it changed to (25%). The same applies to comments on page 8 and page 9.

- Mike

Subject: HHRA Interim Deliverable, EPC Calculation and Exposure Factors

Attached is a draft of EPA's proposal for resolving issues related to the EPC and Exposure Factors Interim Deliverable. I believe that Dana has been in contact with the HHRA team regarding this. Dana and I made some final modifications to the proposal this afternoon. Please provide any comments you might have by COB tomorrow.

We can talk about this at the TCT check-in tomorrow if you have any questions.

Thanks, Eric
